

SABIT GROUP PROGRAM

AIRPORTS AND GROUND SUPPORT FOR EURASIA

MARCH 11 – APRIL 8, 2006

DELEGATE BIOGRAPHIES

Uzifulla Azhmoldayev

President

Aktobe International Airport

Aktobe, Kazakhstan

As President of Aktobe International Airport, Mr. Azhmoldayev is responsible for a staff of over 350 at this private airport. While on the SABIT Program, Mr. Azhmoldayev is interested in learning about passenger and cargo terminals, passenger services, pavement/runway issues, financing, and effects of climate on maintenance. One of his main goals for his airport is to upgrade the airport's main terminal; and he hopes that what he sees in the United States on the SABIT Program will give him a better idea of what he needs to do, and what kind of equipment he will need, in Aktobe.

Irakli Davitadze

Deputy Chairman of Transport Department

Ministry of Economic Development, Georgia

Tbilisi, Georgia

As Deputy Chairman of the Transportation Department in the Ministry of Economic Development, Mr. Davitadze is responsible for policy concerning infrastructure development, including airport infrastructure. One of Mr. Davitadze's primary goals is modernize Tbilisi International Airport, and upgrade several smaller regional airports. In order to improve the operations and services in Georgia's airports, Mr. Davitadze is very interested in airport construction financing, passenger services, equipment (i.e., passenger stairs, boarding bridges, and utility vehicles), and the role of regulatory agencies.

Aleksandr Dolgiy

Head, Technical Services and Maintenance

Kishinev International Airport

Kishinev, Moldova

Working at Kishinev International Airport for over a decade, Mr. Dolgiy has significant experience with most facets of the airport's operations. The airport handled roughly 300,000 passengers in 2004, a significant increase over its 2003 traffic, and several major European carriers fly to Kishinev. While on the SABIT Program, Mr. Dolgiy is interested in learning about facility development, runway lighting, equipment and vehicles, and passenger services (check-in, waiting rooms, business centers). His eventual goal is to develop and modernize the facilities at Kishinev International Airport.

Nataliya Glushko

Director of Operations

International Airport Donetsk

Donetsk, Ukraine

As a popular regional airport, the Donetsk International Airport is a smaller, but important, airport within Ukraine. The Donetsk airport is beginning terminal reconstruction, and Ms. Glushko is very interested in all topics that will help with this process, particularly Ground Support Equipment. Recently, Donetsk International Airport has purchased equipment from FMC, TUG Technologies Corporation, TESCO, and others. In addition to equipment, Ms. Glushko would like to learn about terminal development, runway lighting and signage, and airport financing.

Aram Khachatryan

Infrastructure Manager

Zvartnots International Airport

Yerevan, Armenia

As infrastructure manager and architect for Zvartnots International Airport, Mr. Khachatryan is responsible for the design, construction and development of buildings and facilities for the airport, which services airlines like Lufthansa, Austrian Airlines, CSA, and Aeroflot. While participating on the SABIT Program, Mr. Khachatryan is interested in meeting with companies that focus on the same activities. He is also interested in the organization of the bidding process and management for new projects. Mr. Khachatryan is also very interested in acquiring equipment that will help facilitate the modernization and development of Zvartnots airport.

Rustam Khalikov

1st Deputy Director

"Tojikiston" (Tajikistan Airlines)

Dushanbe, Tajikistan

Mr. Khalikov has worked with Tajikistan airlines for over 12 years, first as a pilot and then as an administrator, thus he has a unique familiarity with airport and airline operations in Dushanbe. As representative on the SABIT Program for Tajikistan Airlines, Mr. Khalikov is interested in many issues affecting airport and airline operations including, passenger services, airport financing and oversight, and ground equipment (baggage and cargo handling, boarding bridges, and catering trucks).

Andrey Kolesnikov
Vice President, Economics and Finance
Alykel, Airport “Norilsk”
Norilsk, Russia

Serving in the position of Vice President of Economics and Finance, Mr. Kolesnikov is concerned with effective and efficient operations of the Norilsk Airport. Most importantly, he would like to see new processes, equipment and technologies that improve the efficiency and capacity of airport operations. Mr. Kolesnikov understands the importance of good services and structure for the airport to attract future investment and visitors. Mr. Kolesnikov wants to learn more about U.S. airport structure, funding, project oversight, and the relationship between airports and airlines, and seeing new equipment in action.

Vladimir Kostenko
Deputy Director of Operations
Boryspil International Airport
Kiev, Ukraine

Mr. Kostenko has worked with Boryspil International Airport for over 11 years. As Deputy Director of Operations, Mr. Kostenko coordinates and supervises the ground handling procedures for the airport and aircraft handling. These operations require great coordination and oversight. As such, Mr. Kostenko is most interested in learning about airport operations, regulations, new technologies, security, safety and emergency response, and ground support equipment (cargo, baggage loaders, aircraft tow tractors, deicers, and transporters). Boryspil Airport is ISO 9001:2000 and ISO 14001:2004 compliant, and just received re-certification for these integrated management systems that have implemented in the airport.

Vasiliy Momot
General Director
Kiev Zhulyany International Airport
Kiev, Ukraine

As the smaller of Kiev's two airports, Kiev Zhulyany International Airport primarily services regional and general aviation customers. Mr. Momot's prime goal is to modernize the airport and form partnerships, so that it becomes the premier airport for business, regional and private clientele. In the United States, Mr. Momot is interested in learning more about the operations of regional and general aviation airports. Some major areas of his focus are passenger services,

terminal development, facility lighting, and ground service equipment (deicing, passenger busses, luggage carts, push-back equipment, and runway sweepers).

Aziz Nabiyeu
Head, Airport Certification and Air Space
Department of Civil Aviation, Republic of Tajikistan
Dushanbe, Tajikistan

The Civil Aviation Department of Tajikistan is responsible for certification of air routes, airports, lighting, and air traffic control. As Department Head, Mr. Nabiyeu and his staff are responsible for overseeing these airport activities and regulations. To accomplish his responsibilities better, Mr. Nabiyeu is interested in examining all aspects of airport operations in the United States, including terminals, lighting, runways, governmental oversight, and deicing and baggage handling equipment.

Igor Pazyuk
Deputy General Director
Airport Yuzhno-Sakhalinsk
Yuzhno-Sakhalinsk, Russia

As Deputy General Director for Yuzhno-Sakhalinsk Airport, Mr. Pazyuk oversees the airport's operations, including passenger services, equipment maintenance and cargo transportation. Yuzhno-Sakhalinsk Airport serves as a major cargo hub in the Russian Far East due to the energy projects underway off the coast of Sakhalin island. During his participation in the SABIT Program, he hopes to hear about terminal development, runways and taxiways, security, ground lighting, airport financing and management, and ground support equipment (deicing, baggage handling, boarding bridges, fueling, passenger buses and towing/push off).

Vitaliy Povonskiy
General Director
Moldaeroservice
Belty, Moldova

Moldaeroservice is the State airport facility in Belty, Moldova, managing the airline and airport services for the region. The airport offers services to passenger and cargo traffic, as well as smaller crafts, such as medical helicopters and private crafts. Mr. Povonskiy is interested in building a small, modern two-story facility in order to attract future investment and passenger activity, particularly developing routes with Romania, Turkey and Ukraine. During his participation in the SABIT Program, Mr. Povonskiy is particularly interested in facility development, cargo operations, signage and lighting, airport operations, deicing

equipment and much more. He is interested in seeing how airports comprehensively develop not only their physical structure, but the land around them – hotel and tourist facilities.

Tatyana Romanovskaya
Deputy Director, Ground Operations
Lvov International Airport
Lvov, Ukraine

As Deputy Director of Ground Operations, Ms. Romanovskaya focuses on airport operations, such as passenger services, cargo/baggage handling, quality control checks, and overall operational management. During her participation on the SABIT Program, Ms. Romanovskaya is interested to hear about tools that can improve service efficiency and quality. She is also interested in the airport/airline relationship, and new technology for electronic check-in, luggage handling and ground support equipment (deicers, baggage handling, conveyor belts, and jetways). Lvov International Airport is a strategic airport for western Ukraine, and while it handles roughly 100,000 passengers a year now, this number is expected to grow as tourism and connections with the European Union are expanded. They currently work with Austrian Airlines and LOT Polish Airlines.

Pyotr Trubayev
General Director
International Airport “Kazan”
Kazan, Russia

With five years at Kazan International Airport and many more as a pilot and director, Mr. Trubayev has considerable experience in airport operations. Currently, Lufthansa flies a route directly in and out of Kazan to Frankfurt four times weekly. He is responsible for over 950 people and overall operations of the airport. Through the SABIT Program, he is particularly interested in discussing terminal and hangar development, passenger services (check in and business centers), ground lighting, and equipment (runway sweepers and deicers).

Yuriy Vasiliyev
General Director
Arkhangelsk Airport
Arkhangelsk, Russia

As General Director of Arkhangelsk Airport, Mr. Vasiliyev is responsible for supervising airport operations. His primary concern is learning about new equipment, as much of the airport's current equipment is obsolete and needs to be replaced. He is also interested in modernizing the runway and lighting equipment, and eventually updating the passenger terminal. While in the United States, Mr. Vasiliyev is also interested in learning about new projects under development and safety issues.

Andrey Zhavoronko
Senior Manager
State Design and Research Institute of Civil Aviation
“Dalaeroproject”
Khabarovsk, Russia

The Dalaeroproject Institute is a design institute under the supervision of the Ministry of Transportation. Founded in 1968, the institute has since been involved with the design and construction of civil aviation facilities throughout the Russian Federation. As Senior Manager, Mr. Zhavoronko not only manages local client projects but also works with international partners. By participating in the SABIT Program, Mr. Zhavoronko is interested in learning about airport development in the United States, including the design and construction process, project planning considerations, and utilizing new technology in design. He is also interested in construction of cargo terminals, and capacity management for larger aircrafts.
